

SAKSHI MORE

DATA SCIENCE TRAINEE CANDIDATE • AI/ML ENGINEER • GENERATIVE AI • DATA ANALYST

Panvel, Maharashtra | +91 8454866503 | sakshi.more2404@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Analytical and research-driven early-career Data Scientist with hands-on experience across machine learning, deep learning, Generative AI (LLMs, RAG, prompt engineering), and applied data analytics. Proficient in Python and SQL, with experience building and evaluating ML models, developing LLM-powered applications, and translating data into actionable business insights. Strong foundation in statistical analysis, feature engineering, model evaluation, responsible AI practices, and risk-focused analytical problem solving.

PROFESSIONAL EXPERIENCE

Data Scientist Intern – AML Department — IDBI Intech

Dec 2025 – Apr 2026

- Built anomaly detection models (Isolation Forest) for transaction monitoring, improving fraud detection accuracy by 10–12%
- Reduced false positives by 12–15% through model tuning, enhancing compliance monitoring efficiency
- Processed 100K+ transactions using SQL and Python with RFM-based data pipelines
- Automated reporting workflows using Python, reducing manual effort by 40%

Data Analyst Intern — Unified Mentor

May 2024 – Jul 2024

- Analyzed 100K+ records using Python and SQL to extract actionable business insights
- Developed Power BI dashboards for KPI tracking and performance monitoring
- Automated reporting pipelines, saving 10+ hours per week

Software Engineer Intern — AoT Solutions

Jul 2022 – Aug 2022

- Optimized SQL queries, improving execution time by 20% and backend data retrieval performance

PROJECTS

AML Fraud Detection System (Machine Learning, Python, Scikit-learn) — [GitHub](#)

- Developed and compared Logistic Regression, SVM, and Gradient Boosting models to flag suspicious transactions, achieving 90–95% accuracy and 0.72 ROC-AUC
- Improved precision and recall through feature engineering, hyperparameter tuning, and robust evaluation techniques

LLM-Based AI Chatbot (Python, Flask, LangChain, FAISS, Groq, MongoDB) — [GitHub](#)

- Built an AI-powered chatbot using LangChain and Groq Llama 3.3-70B with a FAISS-based RAG pipeline for semantic document retrieval and context-aware Q&A
- Designed a LangChain agent with custom retrieval and calculator tools to support multi-turn conversations and mathematical reasoning
- Deployed Flask REST APIs with MongoDB for persistent conversation history, session management, and dynamic prompt construction

Customer Churn Prediction (Machine Learning, Python) — [GitHub](#)

- Built a churn prediction model (~90% accuracy) evaluated using precision, recall, F1-score, and ROC-AUC
- Identified key churn drivers from model outputs to support targeted customer retention strategies

Sales Analytics Dashboard (Power BI)

- Designed interactive Power BI dashboards for KPI tracking and business insights, automating weekly reporting workflows

TECHNICAL SKILLS

Machine Learning / AI: Logistic & Linear Regression, Decision Trees, Random Forest, SVM, KNN, Gradient Boosting, Clustering, Isolation Forest, Model Evaluation & Tuning

Generative AI / NLP: LangChain, LangChain Agents, ReAct Agent, RAG, Prompt Engineering, FAISS, Groq Llama 3.3-70B

Languages & Frameworks: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, PySpark (familiar), Hive (familiar), Flask

Cloud & Tools: AWS (S3, EC2, IAM, Lambda, CloudWatch — familiar, certification in progress), Power BI, Git, MySQL, MongoDB

Core Concepts: Statistical Analysis, Feature Engineering, Data Visualization, EDA, Data Pipelines, Responsible AI Practices

EDUCATION

B.Tech in Computer Engineering, Pillai College of Engineering

2023 – 2026

Diploma in Computer Technology, Bharati Vidyapeeth

2020 – 2023

CERTIFICATIONS

IBM – Python 101 for Data Science (Cognitive Class) • Deloitte – Data Analytics Simulation • Google Cloud – Career Launchpad Data Analytics • Quantum – Data Analytics Simulation
